

Walking in the Chilterns

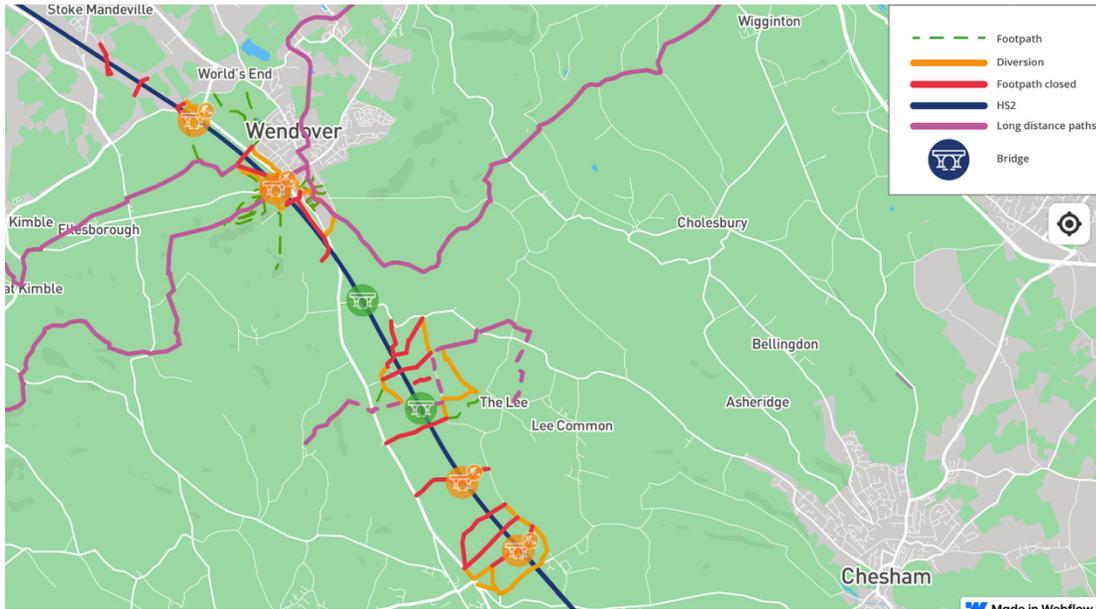

The HS2 railway goes through the Chilterns National Landscape and will have several routes available with bridges for walkers and cyclists to safely cross the line once the construction has finished.

Meanwhile many Public Rights of Way are disrupted, and users may encounter issues when a suggested diversion is either not indicated or also closed. With the evolving state of the paths HS2 have now created an online mapping system showing all the current closures.

The website is available at <https://tinyurl.com/WendoverPRoWs> which can also be reached using this QR code with a smartphone.

The website presents a map showing the long distance paths (such as the Ridgeway and Aylesbury Ring) along with the closures and diversions between Geat Missenden and Stoke Mandeville.

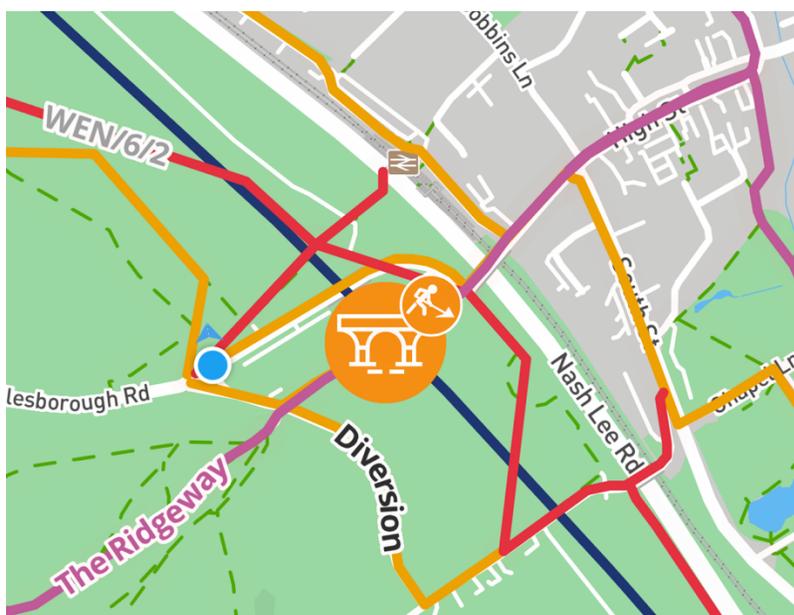

You can zoom in to get specific details

Another useful function for walkers is the ability to show where you are by pressing the location button.

This then overlays a blue dot on the map showing you current position.
